

■ CPU working ■ CPU stall (incl. model wait) ■ Tool ■ Harness

36 live census episodes of the revised selection (all officially resolved). (c) every trajectory action incl. failed/errored calls and the final submit; model-only turns not counted.
AVG = unweighted mean over the 36 tasks; MEDIAN = median over the 36 per-task values (panel d: median of the per-task medians). Grey band = aggregate rows.
